Education

Delhi Technological University — New Delhi, IN
Bachelor of Technology in Software Engineering — *2024 – Expected 2028*

Experience

Full-Stack Developer Intern — July 2026 – Present
Beat22 — *Remote*

- Contributing to Beat22's production mobile marketplace application used by 1,000+ active users
- Building and shipping UI features in collaboration with the Founding Engineer/CTO, working within an existing component architecture and shared data schema
- Gaining hands-on experience with the full feature lifecycle – from technical design discussions through implementation and integration into a live codebase

Projects

dialogOS — Link

- Built a resumable, multi-turn conversational RAG agent by architecting a LangGraph pipeline with PostgresSaver checkpointing on Supabase
- Enabled context-aware tool use by integrating Tavily search and a Cohere-based reranking pipeline over a pgvector store
- Shipped to production by resolving breaking SDK and connection-pooling bugs across Cohere and Supabase's pgbouncer

VoltKey — Link

- Co-founding a unified LLM gateway to simplify multi-provider API access for Indian developers
- Identified a gap in affordable, unified LLM access for Indian developers navigating fragmented pricing and rate limits across providers
- Architecting core routing and cost-management logic to normalize requests across multiple LLM providers

logPilot — Link

- Cut manual log triage by building a cascading classifier that routes logs through regex, BERT, and LLM fallbacks
- Improved routing accuracy by using sentence-transformer embeddings to send each log to the model best suited for its complexity

Technical Skills

Languages: Python, Typescript, C++, SQL
Libraries: React, pandas, NumPy, scikit-learn, PyTorch
Databases: PostgreSQL, MongoDB, Supabase, pgvector
Frameworks: Next.js, Express.js, FastAPI, React Native, Streamlit, LangChain, LangGraph
Developer Tools: Git, Docker, VS Code

Leadership & Involvement

Hospitality Co-Head

- Led a cross-functional hospitality team for Engifest, DTU's annual cultural fest, co-ordinating with a team of 20 members and showcasing strong communication, teamwork and leadership.

Open Source Contributor

- Selected contributor in the Agents for India track, GirlScript Summer of Code, contributing to an open-source AI agents initiative

Co-building ScoutDeck

- An AI-powered opportunity discovery platform that helps students and early-career professionals find relevant fellowships, hackathons, programs, courses in one ranked list.
